

Endovascular Today - US Device Guide - Embolic Particles/Beads

Company Name	Product Name	Composition	Type	Sizes (µm)	Color Coding	US FDA Indicated Use
Boston Scientific Corporation	Contour Embolization Particles	PVA particles	Irregularly shaped flakes	45–150, 150–250, 250–355, 355–500, 500–710, 710–1,000, 1,000–1,180	Labels are color-coded by particle size	Embolization of peripheral hepatic vascular tumors, including leiomyoma, uteri, and peripheral AVMs
Boston Scientific Corporation	LC Bead	Biocompatible, sulphonate-modified, N-Fil hydrogel	Spherical shape	100–300, 300–500	Vial labels are color-coded by particle size	Embolization of hypervascular tumors and arteriovenous malformations (AVMs)
Boston Scientific Corporation	LC Bead LUMI	Biocompatible polyvinyl alcohol hydrogel beads containing a covalently bound radiopaque moiety	Spherical shape	40–90, 70–150	Vial labels are color-coded by particle size	Embolization of hypervascular tumors and arteriovenous malformations (AVMs)
Boston Scientific Corporation	LC Bead M1	Biocompatible, sulphonate-modified, N-Fil hydrogel	Spherical shape	70–150	Vial labels are color-coded by particle size	Embolization of hypervascular tumors and arteriovenous malformations (AVMs)
Merit Medical Systems, Inc.	Bearing nsPVA Embolization Particles	PVA particles	Irregularly shaped particles	45–150, 150–250, 250–355, 355–500, 500–710, 710–1,000, 1,000–1,180	Labels are color-coded by particle size	Indicated for the embolization of AVMs and hypervascular tumors, including symptomatic uterine fibroids
Merit Medical Systems, Inc.	EmboCube Embolization Gelatin	Resorbable porcine gelatin	Gelatin foam	2.5 and 5 mm diameters	Labels are color-coded by cube size	Indicated for use in embolization of hypervascular tumors
Merit Medical Systems, Inc.	EmboGold Microspheres	Trisacryl with gelatin	Colored spherical embolic microspheres	40–120, 100–300, 300–500, 500–700, 700–900, 900–1,200	Labels are color-coded by microsphere size	Indicated for the embolization of hypervascular tumors and AVMs
Merit Medical Systems, Inc.	Embosphere Microspheres	Trisacryl with gelatin	Spherical embolic microspheres	50-100, 40–120, 100–300, 300–500, 500–700, 700–900, 900–1,200	Labels are color-coded by microsphere size	Indicated for use in the embolization of hypervascular tumors including symptomatic uterine fibroids, arteriovenous malformations, prostatic arteries for symptomatic benign prostatic hyperplasia, and blood vessels to occlude blood flow to control bleeding/hemorrhaging in the peripheral vasculature
Merit Medical Systems, Inc.	QuadraSphere Microspheres	Sodium acrylate alcohol copolymer	Spherical embolic microspheres	20–40 (80–160 reconstituted), 30–60 (120–240 reconstituted), 50–100 (200–400 reconstituted)	Labels are color-coded by particle size	Indicated for the embolization of hypervascular tumors, including hepatoma, and peripheral AVMs
Merit Medical Systems, Inc.	Torpedo Gelatin Foam	Resorbable porcine gelatin	Preformed gelatin foam	2.5 mm, 5 mm	2.5 mm = yellow, 5 mm = purple	Indicated for use in the embolization of hypervascular tumors
Terumo Interventional Systems	HydroPearl Microspheres	Polyethylene glycol (PEG)	Bland microspheres	75 ± 30; 200 ± 75; 400 ± 75; 600 ± 75; 800 ± 75; 1,100 ± 75	Labels and microspheres are color-coded by microsphere	Intended for embolization of arteriovenous malformations and hypervascular tumors, including uterine fibroids, and for embolization of prostatic arteries (PAE) for symptomatic

Company Name	Product Name	Composition	Type	Sizes (µm)	Color Coding	US FDA Indicated Use
					size	benign prostatic hyperplasia (BPH)
Varian Medical Systems	Embozene Microspheres	Hydrogel microspheres with Polyzene-F coating	Precisely calibrated spherical microspheres	Wide range of sizes offered in 2 mL syringes: 40, 75, 100, 250, 400, 500, 700, 900, 1100, 1300	Labels, boxes, and microspheres themselves are color-coded by microsphere size	Embolization of arteriovenous malformations, hypervascular tumors including uterine fibroids and hepatoma, and prostatic arteries for symptomatic benign prostatic hyperplasia
Varian Medical Systems	Oncozene Microspheres	Hydrogel microspheres with Polyzene-F coating	Precisely calibrated spherical microspheres	Three sizes in 2 or 3 mL syringes: 40, 75, 100	Labels and boxes are color-coded by microsphere size	Embolization of arteriovenous malformations and hypervascular tumors including hepatoma
